

Rahul Reddy Gangapuram

rahul.reddy.gangapuram.58@gmail.com — (669) 220-9234 — San Jose, CA, US — LinkedIn — GitHub

Professional Summary

Results-driven software developer with strong expertise in AI/ML, Salesforce platform development, and DevOps automation. Proven track record of optimizing system performance and delivering scalable solutions across full-stack and cloud-native environments. Passionate about solving complex problems through clean code, collaboration, and data-driven innovation.

Education

Master of Science in Computer Science, San Jose State University *Aug 2024 – Expected Jun 2026*
Relevant Coursework: Design and Analysis of Algorithms, Topics in Artificial Intelligence, Topics in Machine Learning, Natural Language Processing, Topics in Cloud Computing
Bachelor of Technology in Computer Science, MLR Institute of Technology, India *Jul 2018 – Jun 2022*
Relevant Coursework: Data Structures, DBMS, OOP, Operating Systems, Computer Networks, Data Mining, Cloud Computing, Big Data Analysis, Machine Learning

Skills

- **Languages:** Python, Java, MySQL
- **AI/ML :** Machine Learning, Natural Language Processing, Large Language Models
- **Salesforce:** Apex, Lightning Web Components, Flows, SOQL, SOSL, Aura
- **DevOps/Cloud:** Docker, CircleCI, AWS, AutoRABIT, Bitbucket, Copado
- **Frameworks/Tools:** GitHub, JIRA, Confluence, SDLC, Agile, SCRUM

Experience

- Software Developer, Capgemini, Hyderabad, India** *Jun 2022 – Aug 2024*
- Developed and deployed technician workflows using Salesforce Field Service Mobile, reducing operational errors by 15% and enhancing data accuracy.
 - Evaluated and implemented Resource Schedule Optimization (RSO) tools; delivered proof-of-concepts that shaped final architecture.
 - Translated business requirements into technical specifications, improving feature adoption and resolving high-priority defects.
 - Refactored Apex triggers and classes for bulk operations, cutting processing time by 20% and increasing test coverage from 60% to 90%.
 - Redesigned Salesforce data models and integrated external systems, improving scalability and data integrity.
 - Documented system architecture, development workflows, and feature changes in Confluence and optimized task tracking via JIRA, enhancing team collaboration.
- Software Engineer Intern, Capgemini, Hyderabad, India** *Feb 2022 – Jun 2022*
- Developed an end-to-end Salesforce solution for car manufacturing use case, automating processes across production, marketing, and delivery using Apex, LWC, SOQL, and custom data models.
 - Enforced robust security using roles, profiles, and permission sets, ensuring scalable access control.

Projects

- SkillForge** *May 2025*
- Built a collaboration platform for hackathons that connects individuals based on complementary technical skills, enabling project discovery, team formation, and real-time messaging.
 - Developed a pipeline using Firebase Storage and Google Gemini API to extract and analyze resume content for skill identification, automatically enriching user profiles with relevant technical competencies.
 - Implemented AI-powered skill-to-project matching using NLP and semantic similarity, allowing users to post/join projects based on skill needs, enhancing inclusivity and collaboration for solo hackathon participants.
- Intent Classification Chatbot System** *May 2025*
- Built a chatbot using DistilBERT for intent detection and Mistral 7B (Dolphin 2.6) for response generation.
 - Evaluated multiple LLMs (FLAN-T5, Zephyr, Gemini) and deployed best-performing model in a real-time Streamlit + FastAPI application.
 - Achieved 91.89% accuracy using the Amazon MASSIVE Intent (en-US) dataset; improved data balance by generating 150+ synthetic utterances per intent.

Certificates

- **Salesforce:** Associate, AI Associate, Trailhead Double Star Ranger (263 badges, 20 superbadges)
- **DevOps:** AutoRABIT ARM Onboarding, Copado Fundamentals I
